(NOVELTIES 1930)

ALL RAISED BY B. & L.

Each—s. d.

- ***D. B. CRANE**, deep lavender, semidouble flowers with shades of blue, small white eye. This bears extra large flowers well placed on massive spikes, very shapely with pyramidal form. This was conspicuous in our Gold Medal Group at the R.H.S. Hall on July 5th, 1929, when it was given its name. An early variety. 5½ft. 40 0
- ***LADY BARBARA**, a beautiful shade of pale mauve, lightly touched with sky-blue, large semi-double flowers with white eye. A very vigorous plant, throwing its fine spikes to a height of 6½ft. Mid-season 40 0
- LADY BATH**, a full double flower, two inches in diameter, deep blue with some shades of lavender, the spike is broad, symmetrical and of pyramidal shape with many branches. This perfectly wonderful variety sets a new standard in Double Delphiniums, and will be indispensable for exhibition when plants are available. At present stock is scarce and there are only a few for disposal. Late flowering (non-seeder). F.C.C., B.D.S. 4½ft. 100 0
- ****LADY ELEANOR**, colour sky-blue with light shades of pale mauve, the blue much predominating. The flowers are double, the inner petals being waved giving a rich effect on long shapely spikes. This lovely variety was much admired on the occasion of the visit of the British Delphinium Society to our Nursery in June 1929, and we predict for it a great future for exhibition and garden decoration. The plant has a free habit with light graceful stems. Mid-season. A.M., B.D.S. 6ft. 50 0
- ***LADY MARGARET**, a lavender self with very large semi-double flowers of fine substance, eye striped black. This variety suggests Lady Edith, but is much more massive in character with broad well-furnished spikes of fine proportions. A gem for exhibition. Rather late. 5ft. 50 0
- ***LADY TERESA**, deep rosy purple, a fine self-colour with extra large semi-double flowers. The eye is remarkable being white with violet stripes. Long shapely spikes and bold habit. Mid-season. 6ft. 40 0

THE ABOVE FIVE VARIETIES (excluding LADY BATH) for £10.**NOVELTIES OF RECENT INTRODUCTION.**

- ***LADY BERTHA**, the large flowers of this fine novelty are a pleasing shade of lavender on a background of blue sepals, with black eye. These are well placed on a massive spike, broad at the base tapering to a point. 5ft. 21 0
- ***LADY DOROTHY**, an almost self-coloured lilac-mauve, with small black eye. The extra large florets are finely formed and of splendid substance. Spike long and shapely. 5ft. 6in. 21 0
- ***LADY MAY**, a distinct and beautiful variety resembling somewhat Mrs. Foster-Cunliffe in form. The very large flowers are delicate bluish-mauve and have no eye, thus conveying a lovely self-coloured effect. These are borne on long pedicels, making an open graceful spike. The plant has a branching habit and so is excellent both for the border and cutting. 4ft. 6in. 21 0
- ***LADY ROSE**, a finely-formed semi-double flower with deep-blue sepals almost covered by the bright rose-coloured petals, eye inconspicuous. Long well-proportioned spike. 5ft. 6in. 21 0

Show Notes

The British Delphinium Society.

The B.D.S. started in 1929, is now an established institution and enthusiasts of the cult have joined up in good numbers from all parts of the country. The first show held in the R.H.S. Hall was an unqualified success, the new Hall presenting a magnificent appearance on that occasion. The collections of Delphiniums forming the various exhibits were generally acknowledged to be the finest ever brought together.

The Year Book is alone worth the amount of the subscription (7/6), containing helpful articles from many members.

We strongly advise all interested to join the Society.
